

DISINFECTANT WIPES...

Decontaminate & Disinfect in One Easy Step
Simple & Convenient
Kills over 99.99%*

The latest product evolution from the creators of *Benefect* is Botanical Disinfectant Wipes! Specifically designed for the needs of the restoration contractor and to complement our Botanical Disinfectants & Cleaners.

Health Canada registered to kill over 99.99%* of common disease-causing organisms such as Staph, Salmonella, Pseudomonas, E-coli and Influenza (Flu virus). The convenient single-use wipe prevents cross-contamination on any surface where germ control is a concern.

Combining the same proprietary Botanical Active Ingredient that *Benefect* is known for, with a new, extremely durable, wood pulp wipe, we have created a Restoration Grade product that is strong enough to tackle rough surfaces like wood and concrete with no shredding, pilling or lint left behind.

Adding the *Benefect* Decon 30 platform to a dense woven wipe also gives it a distinct foaming advantage that ensures longer contact time to kill germs and improved visibility of surface coverage over conventional wipes. Surfaces are left clean and decontaminated with no streaky residue. Just wipe and walk away!

Ideal for decontamination, preventing cross-contamination, cleaning, disinfecting and deodorizing surfaces such as equipment, PPE, or building contents. Also ideal for controlling the spread of germs by disinfecting high-touch areas in residential or commercial cleaning.

Strong, Durable Wipe

Tools & Equipment

Commercial Cleaning

Protective Equipment

High Touch Surfaces

Like all *Benefect* products, only authentically sustainable components and botanical ingredients are used. The *Benefect* Wipe does not contain any silicone, binders, filler or other chemical additives.
