

Multi-Purpose Smoke Remover & Cleaner for Ultrasonic Systems

An all-natural formula specifically formulated for use in leading ultrasonic equipment manufacturers' systems. Ideal for all restoration cleaning jobs from light soot to heavy, greasy or sticky soils on contents soiled by smoke, water or mold.

Evergreen A-44 utilizes Benefect's innovative, Bio-Based Optimized Dynamic Chemistry & counter ionization to deliver rapid penetration and ultra-fine dispersion of the soils instead of the traditional high pH, glycol or phosphate chemistries. Safe for use on all fabrics, plastics, rubber, glass & metals.

Safety Profile: Skin safe; low pH & non-corrosive. Inhalation safe; no VOCs (Volatile Organic Compounds) or solvents such as butyls, ammonia or glycols.

Environmental Profile: Contains only naturally-occurring, sustainable & biodegradable ingredients. No solvents, petrochemicals, phosphates, alkyl/nonyl phenol ethoxylates, dyes, fragrances or other synthetic or hazardous ingredients.

Disposal: Safe to dispose of down drain or into water treatment system; no aquatic toxicity & readily biodegradable.

Storage/Transport: Not DOT/TDG regulated.

Directions: Dilute based on label instructions below or based on your ultrasonic equipment manufacturer's recommendations.

General: Light – Heavy: Dilute 2.5 - 5 oz/gallon in hot water.

Delicates: Light – Heavy: Dilute 2.5 - 5 oz/gallon in warm water (delicate or painted items may require more care. Spot check for compatibility first).

Rinse with warm or hot water after cleaning.

More cleaner can be added for heavier soil loads producing a more aggressive cleaning action.
